BROUGHT TO YOU BY ISUZU

Qantas Business Rewards Trade Mate

Thanks to our partnership with Qantas Business Rewards, your business can earn Qantas Points as an Isuzu Trade Mate*. When you become an Isuzu Trade Mate member your business will earn 1 Qantas Point for every dollar you spend on eligible Isuzu Truck parts or accessories purchased from participating authorised Isuzu Dealers.

Apply now to earn Qantas Points for your business*.

*Terms and Conditions apply.

To find out more scan the code or visit www.isuzu.com.au/our-range/parts/isuzu-trade-program/

Reward your business for purchasing Isuzu Truck parts and accessories...

Your business can use Qantas Points earned on a range of rewards including booking flights, upgrades and more. Or you can transfer your business's Qantas Points to any Qantas Frequent Flyer account to use on car hire, hotels, wine or choose from over 20,000 products at the Qantas Marketplace*.

ISUZU GENUINE PARTS

Earn Triple Qantas Points on these Isuzu Genuine EGR & Turbocharger Kits.*

EGR Valve & Cooler Kit

Kit includes: EGR Valve, EGR Cooler/s, Gaskets & Hardware for installation

92959660	FR*/FS* with 4HK1 Engine MY2007-2015	\$1,220.70

RUN THE ROAD. RUN THE TRAIL.

EX2 Blackout lights combine an all-black housing with dual-colour position lights allowing you to switch between white and amber to suit the conditions or your build. The hybrid beam pattern delivers exceptional width and distance with no dark spots, while internal switching makes installation easy. Built tough with a hard-coated polycarbonate lens and smoked lens cover, all backed by a seven-year "no fault" warranty, these lights get you to the job site safely, are perfect for weekend rigs and make sure you stand out without showing off.

DUAL COLOUR POSITION LIGHTS

To stand out and be seen, the EX2 Blackout lights deliver. Their signature dual-colour position lights switch between white and amber LEDs, enhancing visibility and style. Using separate, purpose-built amber and white LED chips, the position lights provide a brighter, more defined glow that ensures you're noticed in any environment. Whether heading to work or tackling winding mountain roads, the EX2 Blackout's powerful beam lights the way, while the striking position lights make sure you're seen.

BUILT TOUGH

You can't afford to second-guess your gear and need lighting that works as hard as you do. EX2 Blackout lights handle the toughest conditions. With hard-coated polycarbonate lenses that resist UV, scratches and chemicals. A one-piece die-cast aluminium housing and glass-filled nylon brackets, these lights take the hits and disperse heat without rust. IP68 and IP69K ratings make them submersible and pressure-washer safe. There are no weak links here. This is lighting you can trust on mining roads, in the city or on fire trails.

EASY INSTALLATION

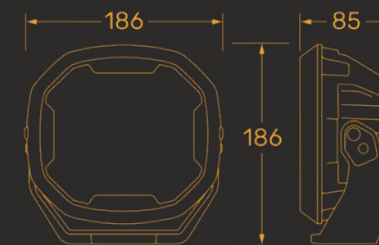

You work on your rig after hours and expect your lighting to install cleanly and quickly. EX2 Blackout makes that easy. Internal switching means no relay and no wiring harness to hide. Simply patch into your high beam and fuse directly to the battery. All the relays and switches are built into the lamp, keeping your engine bay tidy. Fewer parts and faster installs deliver a stealth look that suits your build, with no hype required.

Isuzu Leads with Frontline Capability at AFAC26

Isuzu Australia Limited (IAL) brought a targeted display of emergency response equipment to AFAC 2026, demonstrating how the latest application designed and engineered models from the market leader deliver safer, more effective operations across Australia's emergency services sector.

Held at the Melbourne Convention and Exhibition Centre from 18 to 21 August, AFAC26 is Australasia's largest emergency management conference and exhibition.

This year's theme, "Leading Together: Integrity, Inclusion and Impact", will explore how ethical, inclusive leadership can strengthen innovation, community trust and frontline outcomes. Isuzu's AFAC26 stand will feature the NQS 80-175 4x4 in crew and single cab configurations.

Leading together

For Isuzu, the theme reflects the long-practiced approach the company has to its product development and engineering with events such as AFAC featuring the coming together of key collaborators in the emergency services agencies, frontline crews, fleet teams, engineers, specialist body builders, and Isuzu dealers and product experts.

"Emergency response capability is built through genuine cooperation, shared expertise and a clear understanding of what crews face in the field," said IAL's Head of Sales, Craig White.

"AFAC gives us the opportunity to listen directly to the people who specify, operate and maintain this specialist equipment, and to display how we reflect and incorporate that feedback in our product development and design."

On stand from Isuzu Power Solutions (IPS), the GS012-ETT 12 kVA 'Little Genny' generator set

On stand

Isuzu will exhibit at Stand 238 throughout the event and will also sponsor the AFAC26 Welcome Function in the exhibition hall on Tuesday 18 August.

The stand will feature the Isuzu light truck off-road performer, the NQS 80-175 4x4 with two models on display - in crew and single cab configurations, and from the Isuzu Power Solutions stable, the GS012-ETT 12 kVA

'Little Genny' generator set and an Isuzu industrial pump engine configured for emergency services and firefighting applications.

NQS 4x4

At the centre of the display will be two stalwarts of countless emergency service and remote disaster response fleets, an N Series 4x4 truck. For AFAC 2026, Isuzu is showcasing the all-new NQS 80-175 4x4, in both crew and single cab form.

Rated at 8,000 kg GVM, the NQS is powered by Isuzu's four-cylinder 4JZ1-TCH engine, producing 129 kW at 2,680 rpm and 460 Nm from 1,500 to 2,680 rpm.

In the NQS the 4JZ1 is mated to the impressive Isuzu nine-speed MYR-9R dual-clutch transmission, offering fully automatic and clutchless manual operation - a boon for volunteer fleets with a diverse driving pool.

The NQS part-time four-wheel drive system combines direct High range with a 2.14:1 Low range, providing surefooted momentum for the difficult terrain often faced by Australian fire and rescue crews.

The crew cab provides seating for up to seven crew, including a four-person rear bench, while the single cab offers a lighter tare weight for applications with greater payload demands.

Both units share a 3,395 mm wheelbase and a 14-metre kerb-to-kerb turning circle, supporting manoeuvrability in regional towns, tight access points on off-road tracks and field environments.

The new NQS 4x4 has serious off-road ability and right mix of features and specifications for emergency fleets. The NQS also carries Isuzu's full suite of driver assistance systems keeping crews safe both on the way to a job and whilst in the midst of the action.

This includes Adaptive Cruise Control, Advanced Emergency Braking, Electronic Stability Control, Lane Departure Warning, Attention Alert System and Traffic Sign Recognition. Driver and front passenger airbags, seatbelt pretensioners and an ECE-R29 cab with side anti-intrusion beams add further protection.

"The new NQS brings together the right payload-to-driveline mix for local fire applications.

"It has serious off-road ability and right mix of features and specifications our emergency fleets need," Mr White said.

"This ease of use and the familiarity of the Isuzu approach to vehicle design and operation, means that the vehicle is simple to use and approachable for a diverse driver group.

"When the activate safety suite and cabin technology is taken into account, you have a powerful offer that the fire agencies and their body builders can tailor to their specific requirements for teams, equipment and operational roles."

The NQS 4x4 carries Isuzu's full suite of driver assistance systems keeping crews safe both on the way to a job and whilst in the midst of the action.

Portable power, flexible operation

Another product highlight on stand this year is the all-new Isuzu Power Solutions (IPS) GS012-ETT generator, set to bring feature-packed Isuzu diesel power to emergency response, staging and recovery work for the first time in 2026.

The compact three-phase unit provides 12.1 kVA prime output and 13.3 kVA standby output, with a minimum 10.5-hour runtime from its 40-litre fuel tank.

The compact GS012-ETT generator, the newest addition to Isuzu Power Solutions Genset range. "A key deliverable in the development of these models was providing more usable power,

longer operating time, simplified installation options and advanced electrical protection features, all within a compact, site-ready package," Mr White said.

"Reliable power remains essential well beyond the initial response, particularly when disaster or weather outages affect communications, lighting, refrigeration, pumping and recovery facilities," Mr White said.

"The new GS012-ETT is compact, transportable and designed to give emergency services flexible, well-protected power wherever it's required."

In further product from the IPS stable, the stand will showcase a 3CA1PZ01 4-cycle diesel engine in one of the most-suited applications for this model - truck-mounted pumping duties.

Capability & support

Isuzu product and technical specialists will be available throughout the exhibition in Melbourne to discuss vehicle selection, body integration, power requirements and aftersales support.

Isuzu Service Technical Manager (NSW/ ACT), Jeff Berry, will also present, "Stronger Together: Isuzu Capability That Delivers When It Matters Most," in the Solutions Theatre, examining the role of aftersales support in sustaining frontline capabilities.

"As always, we're excited to meet agencies, operators and industry partners at AFAC26 and continue the work of strengthening Australia's emergency response capacity," Mr White said.

"Of course, this isn't just another trade show for Isuzu - AFAC is a key event for us every year and an opportunity to showcase the know-how and product backup that has seen us top the market charts here for the past 37 years.

"There's no-better example of the need to perform than when your product is specified in emergency service fleets - the requirement to deliver on the promise is non-negotiable and it's this same approach we take with all our customers," he concluded.

The new NQS
brings together
the right
payload-to-
driveline mix
for local fire
applications".

Benefits of Isuzu Genuine Parts purchased through the authorised dealer network.

Isuzu Genuine parts, are components made by Isuzu, for Isuzu Trucks.

The key benefits include:

- Assured Quality and Performance
- Long-Term Value
- Peace of Mind
- Warranty Protection

Warranty Details.

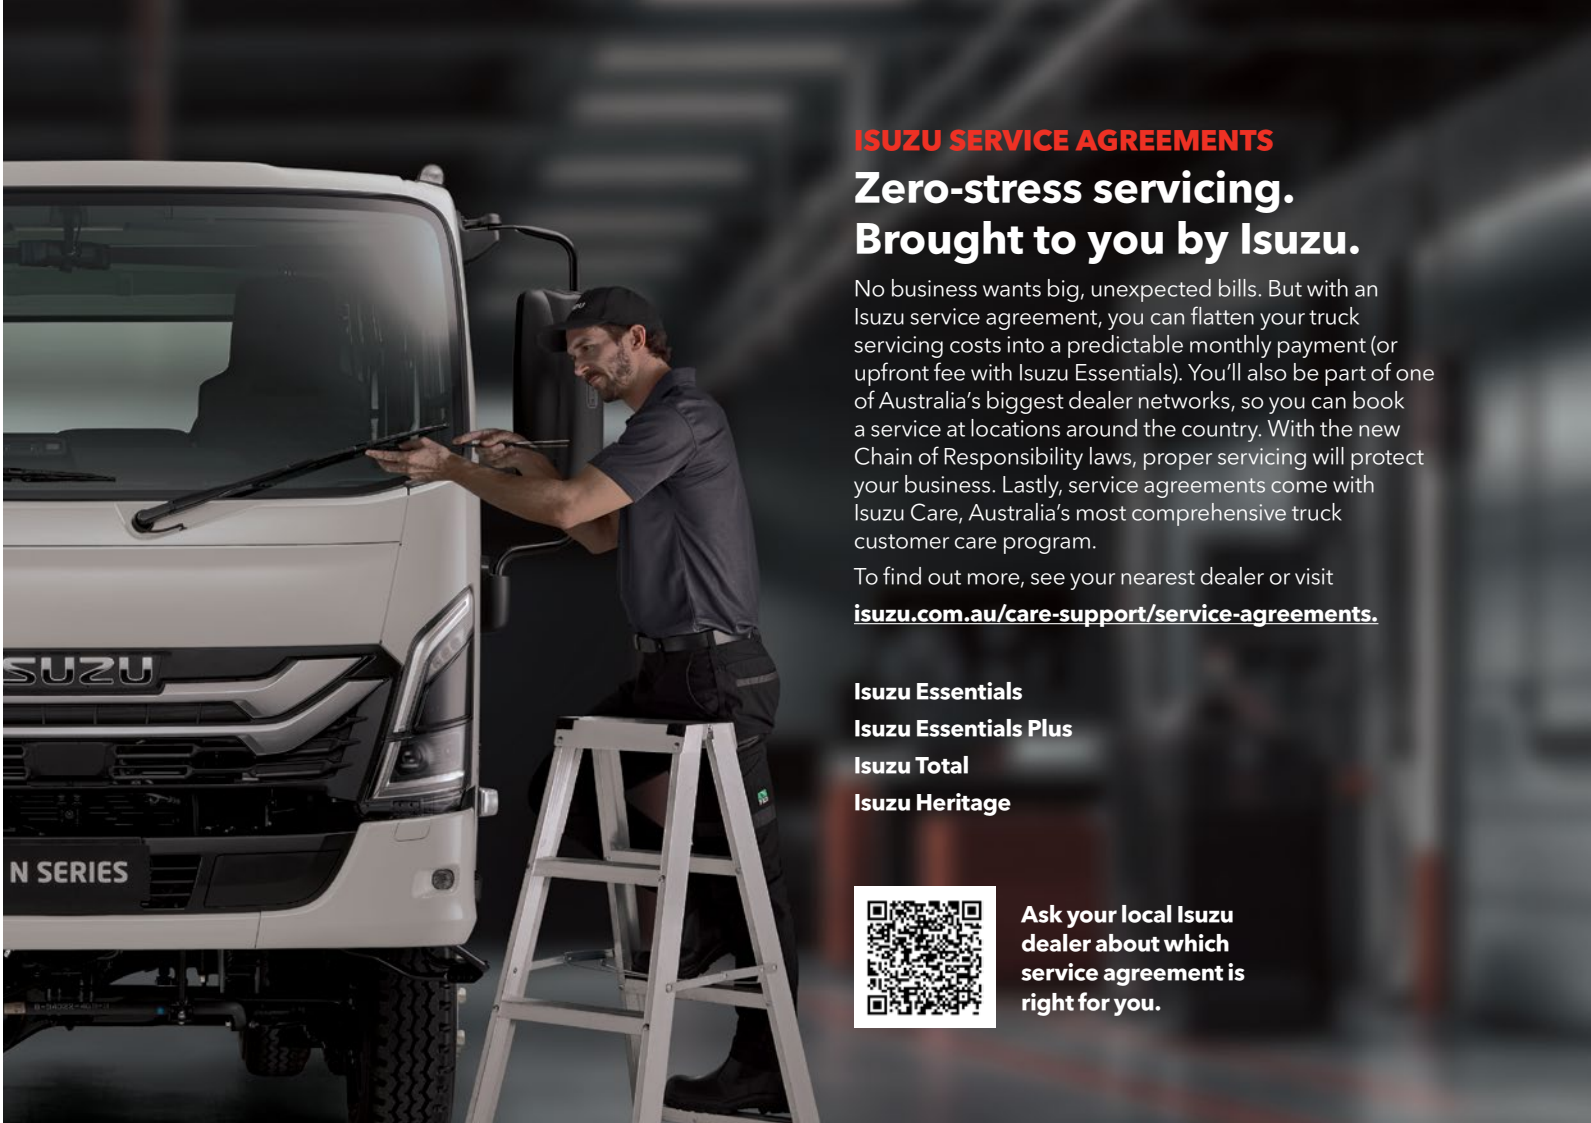

The warranty for genuine parts can vary depending on how they are purchased and installed.

- 12-Month Warranty Over-the-Counter
- 36-Month Warranty When Installed in an Authorised Isuzu Dealer Workshop

Dealership Network.

The existence of a nationwide dealership network, with 74 locations, provides significant advantages to customers:

- Widespread Accessibility
- Expert Service
- Consistent Quality
- Ease of Warranty Claims

ISUZU SERVICE AGREEMENTS

Zero-stress servicing. Brought to you by Isuzu.

No business wants big, unexpected bills. But with an Isuzu service agreement, you can flatten your truck servicing costs into a predictable monthly payment (or upfront fee with Isuzu Essentials). You'll also be part of one of Australia's biggest dealer networks, so you can book a service at locations around the country. With the new Chain of Responsibility laws, proper servicing will protect your business. Lastly, service agreements come with Isuzu Care, Australia's most comprehensive truck customer care program.

To find out more, see your nearest dealer or visit isuzu.com.au/care-support/service-agreements.

ISUZU GENUINE PARTS

Only the best service and parts.

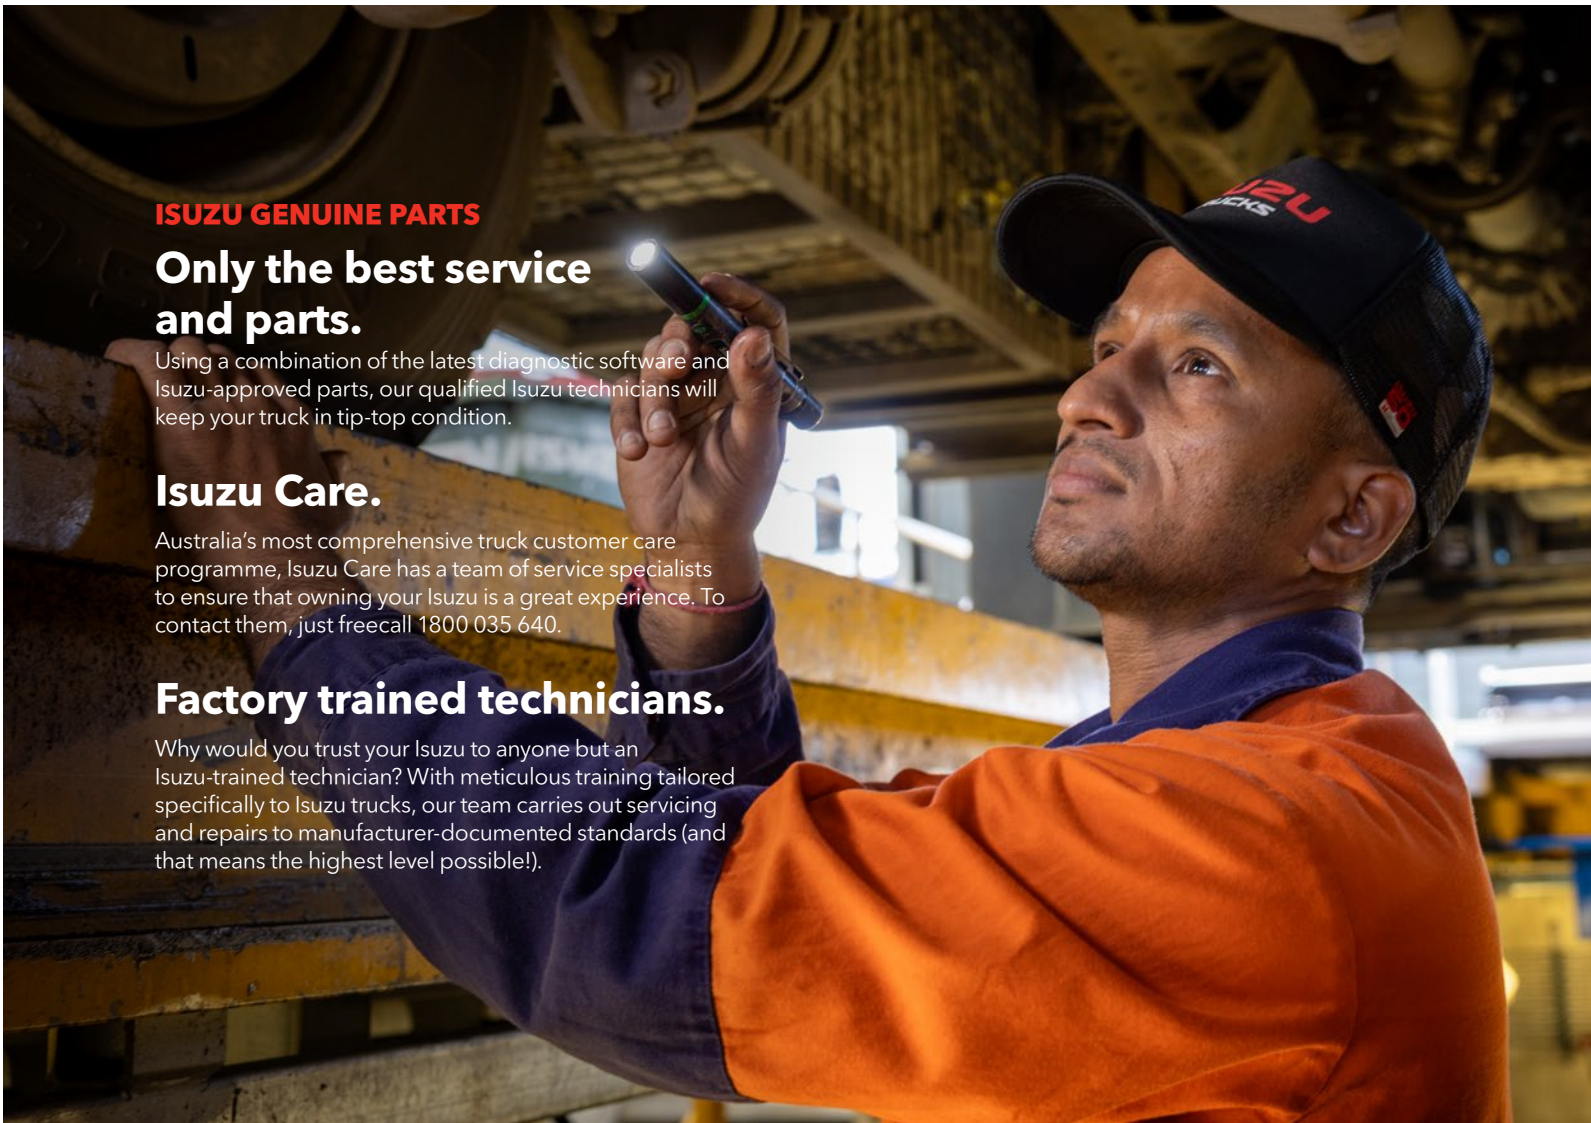

Using a combination of the latest diagnostic software and Isuzu-approved parts, our qualified Isuzu technicians will keep your truck in tip-top condition.

Isuzu Care.

Australia's most comprehensive truck customer care programme, Isuzu Care has a team of service specialists to ensure that owning your Isuzu is a great experience. To contact them, just freecall 1800 035 640.

Factory trained technicians.

Why would you trust your Isuzu to anyone but an Isuzu-trained technician? With meticulous training tailored specifically to Isuzu trucks, our team carries out servicing and repairs to manufacturer-documented standards (and that means the highest level possible!).

Isuzu Legacy

Isuzu has a comprehensive range of parts to suit older model Isuzu Trucks, all manufactured to high standards and backed by a 12-month, unlimited kilometre parts warranty. Reliability is Everything!

STAND OUT WITH ANTARES

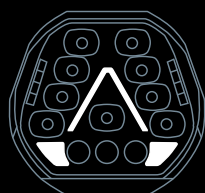

POWERFUL PERFORMANCE, PERFECT FIT
TAKE CONTROL OF YOUR LIGHTING TODAY

ANTARES 7-INCH

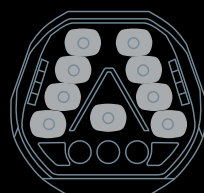

The Antares 7-inch driving lights deliver outstanding visibility wherever the road takes you. Enjoy versatile lighting that's built for both adventure and everyday driving—without compromising on clarity or style.

**HIGH
OUTPUT MODE**

**DAYTIME
RUNNING LIGHT**

**POSITION
LIGHT**

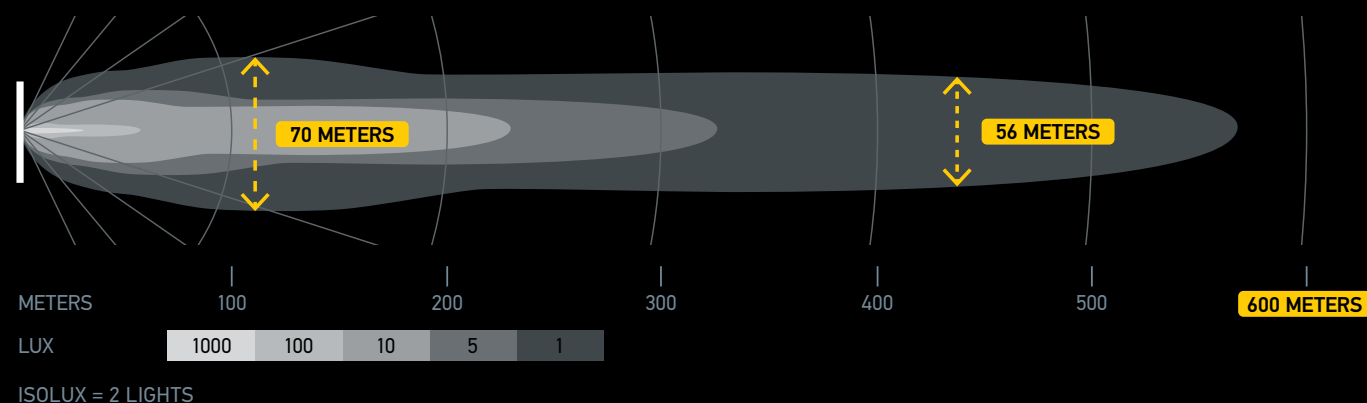

Ideal for smaller vehicles or tighter mounting spaces without sacrificing performance, the Antares 7 inch provides significant light output:

- 70m wide beam exceeds 110m distance, thanks to ultra-wide specific LED clusters
- Mid-range width of 56m that exceeds 400m distance with the umbrella LED optic
- Precision Projector LED gives a total distance exceeding 570m
- All at the industry standard of 1 lux

ES Compleat™ 50/50 Premix

LIFETIME, HEAVY-DUTY, HYBRID
ANTIFREEZE/COOLANT

ES Compleat™ 50/50 Premix is an ethylene glycol coolant specifically for use in heavy-duty diesel engines. It contains conventional heavy-duty chemical and organic corrosion inhibitors, which provide enhanced protection for diesel engines from liner pitting and hard water scale deposits.

ES Compleat™ 50/50 Premix is fully compatible with all other antifreeze/coolants and corrosion inhibitor packages and is formulated to last till engine rebuilt and can be used until contamination levels are exceeded.

ES Compleat™ 50/50 Premix, ready-to-use, provides the highest water pump protection available in the marketplace and is fully formulated with de-mineralised water.

Performance

- Fully formulated life-of-the-engine hybrid coolant with 1,600,000 kms useful life under normal conditions
- Test at 250,000 km, 4,000 hours or once/year; only add SCA when needed
- Provides freeze protection and raises the boiling point to 128°C (101 kPaG)
- Maximum corrosion and liner pitting protection with conventional heavy duty chemical inhibitors and organic acids
- Fully meets requirements of ASTM D6210, Cummins CES14603, CES14439, AFNOR NF R15-601
- OEM requirements including: Case New Holland, CAT, Cummins, DDC, EMD, Freightliner, International, John Deere, Komatsu, Kubota, Mack, Mitsubishi, PACCAR, Volvo, Waukesha

Serviceability

- Minimal maintenance - does not require SCA pre-charge
- Always maintain the cooling system by topping up with ES Compleat™ 50/50 Premix (not water) and maintaining the inhibitor level with supplemental coolant additive (SCA) using DCA-4 chemical water filters or DCA-4 Liquid, as guided by test strip results (CC2602M, CC2602AM), or condition monitoring testing

ES Compleat is available in the following packaging sizes:

Description	ES Compleat 50/50 Premix Part No.	Price
20 Litre	CC2827ASP	\$107.70
208 Litre (Drum)	CC2827ASD	\$899.75
1,000 Litre IBC	CC2827AST	\$4,340.35

Fleetguard's ES Compleat™ 50/50 Premix Extended Life Coolants meet or exceed the performance requirements of the following:

Meritor® Premium Brake Shoe Kits

Meritor® MG2A Premium Brake Shoe Kits feature high-performance linings exceeding FMVSS 121 standards and are GAWR rated to 23,000lbs/10.5t. Steel rivets with oil coating provide secure attachment and reduce cracking risk. Assembled in Melbourne, Australia, each kit undergoes a seven-stage quality check for consistent quality. These kits offer optimal stopping power, extended brake life, and lower maintenance costs. All components meet Meritor standards and are designed for advanced performance. Each kit contains two lined brake shoes and hardware for one wheel end.

ISUZU

Genuine Batteries

The Isuzu Battery Difference

Isuzu's range of sealed maintenance free batteries are designed and manufactured to the highest quality standards, ensuring exceptional performance and reliability.

1 ROTARY PLATES

- Specialist advanced plate design provides longer service life and resistance to corrosion and material shedding.
- Lower internal resistance promoting higher CCA and improved vibration resistance.

2 ENHANCED PLATE PASTE

- Reduces water loss and improves charge acceptance for superior performance and cycle life.

3 SEPARATORS

- High Porosity Polyethylene Envelope (PE) separator improves puncture resistance and durability.
- Improves electrolyte dispersion for enhanced performance and power.

4 FLAME ARRESTOR

- The integrated flame arrestor in the central venting system protects the battery from explosion due to external ignition sources.

5 MUD RACK

- Mud rack container design improves plate support, vibration resistance and isolates paste deposits to prevent short circuits.

6 POLYPROPYLENE CASE

- Reinforced design provides durability to withstand shock and vibration.

7 CARRY HANDLE

- Ergonomic design provides a thicker grooved carry handle to improve comfort.
- Utilises fully constrained safety design with pivot pin moulded directly into the case.

8 STATE OF CHARGE INDICATOR

- For on the spot diagnosis of battery condition.

9 CAST ON STRAP

- Thicker cast on strap ensures durability and lower electrical resistance to promote longer life.

10 LABYRINTH LID TECHNOLOGY

- Provides spill proof protection up to 90 °.
- Reduced water loss.

UNLEASH THE

Little Genny

This compact generator is the newest addition to the IPS generator range and is available in a choice of 9kW Single Phase or 12kVA Three Phase. It delivers a scarily impressive output and extended runtime in a rugged, site-ready package. A clever integrated change-over switch lets you go from hard-wired configuration to the generator outlet at the flick of a switch. It comes complete with a brushless alternator, heavy-duty circuit breaker for superior protection against electrical faults, and removable forklift pockets. The Little Genny from Isuzu Power Solutions – it's a bit of a beast. www.isuzu.com.au/our-range/power-solutions

Donaldson Blue® Air Filters with Ultra-Web® Fine Fiber Technology

Ultra-Web® Advantages:

- Engineered to perform in extreme temperature and humidity conditions, unlike ordinary fine fibers
- Optimized fiber structure and fiber diameter so it's stronger and lasts longer in all environmental conditions
- High efficiency – longer engine life
- High capacity – holds more contaminant
- Identifiable by the blue media color
- Proven – used in diesel engine market for nearly two decades

Fleetguard® Service Filters for
Cummins ISXe5 & X15

When you buy a Fleetguard product, you are assured superior warranty protection from the point of purchase throughout the recommended life of the product. Unlike industry competitors, Fleetguard® warranty coverage is not pro-rated, which means you are fully protected through the recommended service life of the product. These factors make the Cummins Filtration Warranty one of the best in the industry.

LF14000NN	Cummins ISX/ISXe5/X15/ISM/ISMe5	\$63.50
LF9039	Cummins ISC/ISL/ISLe5	\$68.55

Extend
Cummins X15
Euro 6 service
intervals up
to 80,000kms*

Allowing
the next
generation of
Cummins heavy
duty engines to
truly go further

VALVOLINE PREMIUM BLUE IS ENDORSED AND RECOMMENDED BY CUMMINS.

*Always refer to operator's manual for correct oil drain intervals.

GREASE & TOOLS

Workshop Equipment

ULTRAFLO Oil & Fuel Spill Kit

- Oil & Fuel Absorbent Pad - 500mm x 450 mm (Qty 20)
- Oil & Fuel Absorbent Boom - 1.2m x 76mm (Qty 1)
- Z-Sorb 10L Industrial Oil Absorbent Pack (Qty 1)
- PVC Gloves (Qty 1)
- Heavy Duty Contaminated Waste Bags (Qty 1)
- Instruction Sheet (Qty 1)
- Yellow Waterproof Carry Bag - 40L (Qty 1)

AFUF40OFSK	40 Litre Oil & Fuel Spill Kit	\$201.75
AFZ522	Z-Sorb 22L Industrial Oil Absorbent Pack - 15kg	\$41.05

ULTRAFLO Rotary Drum Pump

The ULTRAFLO Standard Rotary Drum Pump is a low-cost drum Pump made using a solid cast iron construction. This Rotary Drum Pump is capable of dispensing a litre of fluid in approximately 3 rotations. FEATURES & BENEFITS:

- Solid cast iron construction
- Approx. 3 revolutions per litre
- 3-piece steel suction pipe & 2" bung adapter
- Suitable for most motor oils & diesel
- Not recommended for petrol or gear oil

AFAP2220	Standard 205L Rotary Barrel Drum Pump	\$79.85
AFAP2220H	Standard 205L Rotary Barrel Drum Pump with Hose & Nozzle	\$133.05
AFAP1321	Heavy Duty 205L Rotary Barrel Drum Pump	\$116.95
AFAP1321H	Heavy Duty 205L Rotary Barrel Drum Pump with Hose & Nozzle	\$169.35

BLUEQUIP Adblue Rotary Action Barrel Pump Kit

The Bluequip Rotary Drum Pump Kit boasts a heavy-duty polypropylene construction making it resistant for various industrial grade fluids.

- Heavy duty polypropylene construction
- 2 metres of delivery hose & stainless-steel spout
- Complete with Bluequip adaptor to suit 205L drums
- Ideal for smaller 1-2 vehicle operations

AFFP332080		\$296.75

Isuzu Cutting Customer Costs with Extended Service Intervals

Isuzu Australia Limited (IAL) has enhanced its customer value proposition, extending service intervals for its MY25 model range from 20,000 to 25,000 kilometres.

The update is the result of ongoing engineering improvements and the durability and reliability of Isuzu’s latest powertrain technology, delivering reduced operating costs and increased vehicle uptime for Australian businesses.

IAL National Service Business Manager Glenn Jones said the change reinforces Isuzu’s focus on reducing total cost of ownership (TCO) while improving efficiency for operators.

“When we talk about TCO, we’re looking at the entire picture – the cost of fuel, tyres, maintenance and critically, vehicle availability or uptime,” Mr Jones said.

“Extending our service interval to 25,000 kilometres isn’t a decision we took lightly. It’s backed by rigorous testing and the proven integrity of our product.

“It means less time off the road for maintenance and more time earning for our customers.”

Uptime is king

For operators, reducing scheduled maintenance can provide significant savings over the working life of a truck.

“For a customer running a five-truck fleet over five years, this change could result in approximately 20 fewer scheduled services across the fleet,” Mr Jones said.

“This translates into significant savings on labour, parts and consumables such as fluids, but the greater value is often in the greatly reduced downtime.

“Every hour a truck is in the workshop is an hour it’s not generating revenue.”

Built on product improvement

The extended service intervals have been enabled by innovations across the MY25 range’s core systems, along with the use of high-performance fluids.

Enhancements to Isuzu’s powertrain technology, designed for improved efficiency, complement the latest generation of Isuzu’s Advanced Driver Assistance System (ADAS) and broader refinements across the MY25 range.

“The integrity of every Isuzu truck is designed and built-in from the ground up,” Mr Jones said.

“The MY25 range represents the pinnacle of this approach, with refinements across the board that allow for this increased service efficiency without compromising on performance or longevity.”

Smarter, more efficient ownership

The new 25,000-kilometre interval will also be integrated into Isuzu’s Service Agreement program, combining reduced service frequency with known servicing costs and protection against inflation for the duration of available aftersales packages.

According to Mr Jones, the change demonstrates how Isuzu’s ongoing product development is focused not only on vehicle performance, but also on helping customers manage operating costs.

“It’s about delivering a smarter, more efficient ownership experience, allowing them to focus on their business with the peace of mind that their Isuzu is engineered to work harder, for longer, and at a lower total cost.”

Isuzu’s dealer network has received deliveries of MY25 models including N Series NQR, six-cylinder FV variants and heavy-duty FX models, which are now available across Australia.

ISUZU TRUCKS

ISUZU
RELIABILITY IS EVERYTHING

Dealer Network

Isuzu has the largest truck dealer network in the country, with all 75 locations providing the highest quality Genuine Parts, backed by industry-leading support and warranty. This all means reduced downtime for our customers, freeing them up to focus on the important stuff. And when the parts are fitted by an authorised Isuzu technician, you'll be helping extend the working life of your truck and getting peace-of-mind that money just can't buy. Because reliability is everything!
